(Abstract available)

DESCRIPTORS: \*Particle size, \*Material separation,  
Mechanical properties.

The most important characteristics of granulates are  
discussed in the first part of the paper from the points  
of view of manufacture and application. The term  
granulation encompasses two physically different  
manufacturing processes, size reduction and size  
enlargement. The second part of the paper deals with  
the physical principles underlying size enlargement,  
and an attempt is made to derive the strength of the
